Reginald J. Dixon

Frontend Developer

Passionate Frontend Developer with a strong emphasis on crafting engaging user experiences and innovative web applications. Leveraging over four years of experience in front-end development and cloud migration, adept at creating intuitive interfaces, optimizing performance, and implementing cutting-edge technologies to drive business growth. Skilled in React, Angular, and the MERN stack, with a proven track record of delivering high-quality projects within Agile environments. Committed to staying updated with the latest front-end trends and best practices to continuously elevate development standards and exceed client expectations.

WORK EXPERIENCE

USPS, Garden City, MI

PSE Sales & Services/Distribution Associate   10/2023 – Present

- Delivered high-quality customer service by assisting patrons with a range of postal needs, including selling postage, packaging supplies, and other retail products.
- Accurately processed, sorted, and distributed incoming and outgoing mail and parcels, ensuring efficient delivery within deadlines and maintaining USPS standards.
- Performed daily clerical tasks, such as operating cash registers, managing financial transactions, and maintaining inventory in the distribution area.
- Resolved customer inquiries related to mail services, tracking, and delivery status to ensure customer satisfaction and foster community trust in postal services.
- Adapted to changing workflows and seasonal demand increases, maintaining productivity and accuracy in a fast-paced environment.

Launch, Ann Arbor, MI

DevOps Engineer   06/2021 – 07/2023

- Developed a comprehensive migration strategy and seamlessly transitioned 20+ applications to cloud-based platforms.
- Developed and implemented migration scripts, automation tools, and monitoring solutions to streamline migration workflows.
- Provided technical guidance and support to team members.
- Utilized DevOps tools to migrate internal applications from Virtual Machine to containerized Docker solution.
- Built infrastructure using Terraform, enabling seamless provisioning and orchestration of cloud resources for improved scalability, reliability, and automation in cloud-based environments.
- Implemented continuous integration and continuous delivery (CI/CD) using Jenkins for software projects.

Nexient, Ann Arbor, MI

Front-End Developer   4/2021 – 06/2021

- Utilized React to build a single-page web application.
- Designed, developed, and maintained a user-facing website for a hierarchical organizational chart.
- Integrated with APIs to display data dynamically with Redux Toolkit.
- Demonstrated proficiency in version control systems such as Git.
- Implemented a user login feature with authentication and authorization.
- Conducted unit testing to ensure functionality and usability.
- Collaborated with team members to troubleshoot and debug issues.
